Spring Boot Microservices

Beginner to Guru

Spring Skills Assignment - Externalize Properties

Spring Skills Assignment

- Hard coding configuration values is generally considered a bad practice
- HTTP Client properties are currently hard coded
- These often need to be changed in deployments for performance tuning
- Externalizing will allow the configuration values to be changed without rebuilding
- Assignment - Use Spring to externalize properties of BlockingRestTemplateCustomizer
  - Externalize connection and timeout values
- Several ways in Spring - Your choice!
