React is an open source javascript library for building user interfaces.  
React is a project created and maintained by Facebook.  
React has more than a 100 thousand stars on GitHub and a huge community behind it.  
React has become increasingly popular among developers and is also one of the most sought out skill-sets by companies right now.

React has a component based architecture. This lets you break down your application into small encapsulated parts which can then be composed to make more complex UI.  
React is declarative.
